chisq SimPval distribution, numsig: 497 /1000

[illegible]

Phylogenetic tree of the genus *Pterodroma*. The tree is rooted on the left and branches out to the right. Species names are listed at the tips of the branches, with some names highlighted in yellow. The tree shows a complex branching pattern with many closely related species and some more distinct lineages.

Phylogenetic tree of the genus *Parus*, showing relationships between various species. The tree is rooted on the left and branches out to the right. Species names are listed at the tips of the branches, with some names highlighted in red. The tree shows a complex branching pattern, indicating a large number of species and a high degree of genetic differentiation.

Phylogenetic tree of the genus *Pectinaria*, showing relationships between various species. The tree is rooted on the left and branches out to the right. Species names are listed along the branches, with some names highlighted in red. The tree is complex, with many branches and sub-branches, indicating a diverse and well-studied genus.

tree num 32 Female song present = red, CoopBreed = orange
