[illegible]

Phylogenetic tree of the genus *Parus*, showing relationships between various species. The tree is rooted on the left and branches out to the right. Species names are listed on the right side of the tree, with some names highlighted in orange. The tree shows a complex branching pattern, indicating a large number of species and a high degree of genetic differentiation.

[illegible]

Phylogenetic tree of the genus *Parus*, showing relationships between various species. The tree is rooted on the left and branches out to the right. Species names are listed along the branches, with some names highlighted in red. The tree is divided into several major clades, each containing multiple species. The species names are written in a small, black, sans-serif font. The red highlights are used to emphasize specific species or groups within the tree.

Phylogenetic tree of the genus *Pterodroma*, showing relationships between various species. The tree is rooted on the left and branches out to the right. Species names are listed at the tips of the branches, with some names highlighted in red. The tree shows a complex pattern of relationships, with many species having multiple subspecies or forms. The red highlights are scattered throughout the tree, indicating specific groups of interest.
